

**DURASID<sup>®</sup>**  
cladding & roofline

# CLADDING

DURASID® offers a wide range of applications for both new-build and renovation projects.

The DURASID® plastic profiles are made of a hard foam core covered with a durable, co-extruded top layer. Durasid is available in smooth or wood structures, in various opaque colours, 2-tone colours or photorealistic wood prints.

DURASID® is the affordable, low-maintenance and sustainable solution for your facade!

## Benefits of rigid foam

Simple to put in place

Easy to maintain

Wide range of colours and finishings

Perfectly impact-resistant

Protecting and upgrading the outer wall

Durable and longer lasting appearance

Warm and natural look

Numerous applications

## Maintenance

Durasid® sidings are low-maintenance. Sanding, painting or oiling are no longer needed. The closed surface structure means that the panels do not absorb moisture, virtually eliminating algae growth and moss formation. Superficial dirt from dust, exhaust gases, air pollution, etc. can be cleaned using a sponge, soft brush or high-pressure hose

(max. 80 bar and with the nozzle at least 50cm away). The water must be clean or mixed with a mild household detergent. Aggressive substances or solvents must never be used. Grease and oil stains can be removed using a household degreasing agent.

## Guarantee

The official guarantee that the supplier of raw materials has given to Plastivan NV means that there is a 10-year guarantee with regard to UV-resistance for the following colours from the Durasid® product range: White (RAL 9010) - Cream (RAL 9001) - Sand (RAL 1015) - Grey (RAL 7035) - Woodland oak - Red cedar - African padauk - Siberian larch - Barnwood grey - Sheffield oak.

A 5-year warranty applies for the colours Camel, Anthracite Grey (RAL 7016), Quartz grey (RAL 7039), Blue grey (RAL 7031), Silver, Cedar, Graphite, Olive and Walnut. This warranty states that the extruded panels will not discolour excessively as a result of ultraviolet light.
